## Salah Al Nuwais Managing Director

Salah Al Nuwais is the owner and Managing Director of MEISCO Energy & Industrial Services Co LLC. He has a rich and diverse experience in the Company since 1997 and has developed a smooth and constructive relationship with executive colleagues, Clients, Principals, Suppliers and individuals.

As Managing Director, he is responsible for the successful leadership and management of the organization according to the strategic goals sets for the organization. He provides general management and manages the day-to-day operations and assures a smooth functioning, efficient organization.

His duties encompass handling detailed, complex concepts and problems, balancing multiple tasks simultaneously, and making rapid decisions regarding administrative issues. He also established strong and appropriate dealings with all the clients in the Oil and Gas and Water and Electricity Sector and maintains a productive relationship. He conveys a professional and positive image and attitude regarding the Company and demonstrates commitment to continued professional growth and development.

Salah is a professional who is business savvy, committed to positive results, and possesses a sharp business acumen. He strives to maintain a work environment that is motivating and builds team spirit and ensures that the organization recruits, retains and supports quality staff.

Salah has successfully organized, designed, planned and promoted the participation of the organization for the ADIPEC Exhibitions for several years.

Before entering the Oil & Gas Industry and Trading Sector, he previously worked at ETISALAT from 1998 to 2003, in various capacities, ranging from Marketing,

## Salah Al Nuwais Managing Director

Customer Relations and Customer Care. He also worked on the advertising campaigns for the general image of the corporation. Also worked as a team-member of the Committee, which handled the launching and implementation plans for the new Corporate Logo and Identity for the Corporation. Actively participated in the achievement of the Corporate Website of ETISALAT. He has a keen interest in reading, designing, interior designing, history, travelling, philosophy, study of multi-culture and also an enthusiastic interest in sports.

Salah holds a Bachelors of Science Degree in Speech Communication, from Portland State University, U.S.A.

## ABOUT US

MEISCO Energy & Industrial Services Company LLC provides access to a broad range of products and services to many international companies operating in the United Arab Emirates and the Gulf region. We pride ourselves on being able to undertake projects with unique client requirements in diverse sectors such as Oil & Gas, Water & Electricity, and Industry.

Our offices are located in Abu Dhabi, the capital of the UAE. Abu Dhabi is a strategic geographic location at the heart of the GCC and is at the crossroads of the East and West, making it an important commercial and re-export center. Its historical trading links, coupled with our long term win-win relationships with our clients, have been instrumental in the success we enjoy today.

OUR  
SERVICES

## SERVICES

### Oil and Gas Services

The future economic growth will continue to depend on oil and gas production and the UAE is no exception. A leader in oil production, the country is making giant strides in oil-related development projects. Given its enormous crude reserves, (98 billion barrels—the fourth largest after Saudi Arabia, Iraq and Iran) the UAE will continue to produce oil for the next 150 years and with enhanced recovery technology which could actually enable continuing output beyond current estimates.

Advanced technologies and products offered by our principals enable you, as a valued MEISCO client, to achieve higher levels of performance and enhance the reliability of your operations.

The current economic development plan of Abu Dhabi is to continue expansion of the downstream refining and petrochemical industry to maximize value addition to the Emirate's petroleum reserves. This involves very large capital expenditures over the next five years and provides great opportunities for growth, as well as avenues for the active participation of our principals.

## SERVICES

### Power and Water Services

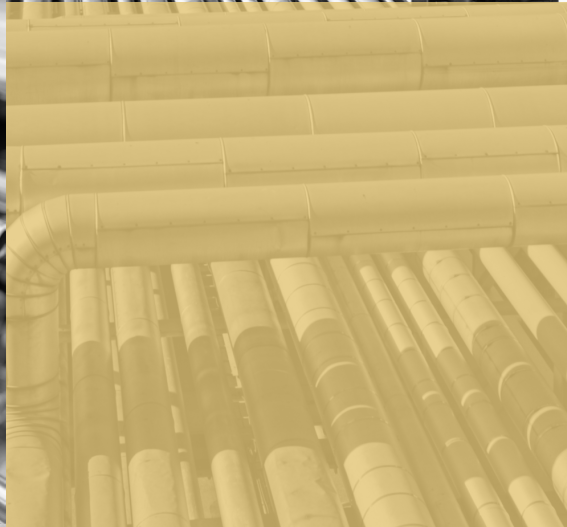

Exponential population growth and increasing urbanization have contributed to an increased demand for power and water supply in the Gulf. Regional governments, realizing this, are constantly developing new strategies and projects to tackle the ever-increasing demand. Their efforts have been focused on the development of new strategies and technologies to improve current water utilization and management. Additionally, the new projects provide immense opportunities that our Principals will benefit from.

MEISCO is able to provide a wide variety of world-class products and services in this important sector.

**AREAS OF  
EXPERTISE**

## AREAS OF EXPERTISE

### Supply to the Power and Water Sector

MEISCO offers a full range of products and equipment for power generation, water production, transmission and distribution, including those required by power and desalination plants, high- and low-voltage switchgear, transformers, cable joints terminations & insulators, iron & GRP pipes, valves, pumps, control and ancillary equipment.

Combined with our reputed partners, MEISCO is able to execute turnkey projects for power and desalination plants, water pipelines, overhead transmission lines, power laying and construction of medium and high voltage substations.

## AREAS OF EXPERTISE

### Industrial Control and Automation

Our aim is to modernize, automate and protect assets with a cost conscious strategy and approach, thereby ensuring customer satisfaction. We are able to supply and install control, instrumentation, safety and inspection systems such as Advance Process Controls, Scada Systems, Solar Power Supplies and Level Instrumentation.

### Corrosion Protection

The high salinity in the Arabian Gulf, coupled with hot climatic conditions, necessitate having in place the latest anti-corrosion technology. Millions of dollars are lost each year due to corrosion and the region's developing petrochemical and construction industries are constantly seeking new ways to protect their infrastructure. We offer an extensive range of protective coating and corrosion protection systems to meet every corrosion containment challenge.

## AREAS OF EXPERTISE

### Chemical Equipment and Steel Structures

#### Chemicals and Chemical Equipment

We represent several companies specialized in Chemical Services and Chemicals, with Products ranging from water treatment to chemical additives and catalysts.

#### Steel Structures

We are engaged in the Design & Fabrication of structures, ducting, pipe work and many other allied services. MEISCO also has the engineering skills, resources and experience to undertake complex projects finished to world-class standards.

## AREAS OF EXPERTISE

### Engineering and Master Planning

Enabled by our exclusive partnerships, we provide our clients with an unrivalled level of engineering excellence, technical proficiency and project management expertise.

With integrated planning, clients are provided with unique solutions from concept through to implementation.

Our project management teams are highly knowledgeable and are able to provide expertise and consultancy on projects pertaining to master planning, city planning, landscaping, mapping, industrial planning and building designs.

## AREAS OF EXPERTISE

### Survey Consultancy Services

MEISCO also represents a survey consultant principle that assists our clients to receive excellent topographical land surveys. Our principle company specializes in topographic surveys, airborne laser scanning (ALS), exploration and mapping, GPS Geodetic Control and 3D Laser Scanning (3DLS). Their modern equipment, using 3D lasers, certifies an accurate survey of the highest quality.

## AREAS OF EXPERTISE

### Environment Protection Services

Environmental concerns are becoming more important worldwide with many countries now having plans in place to reflect their commitment towards making the world a better place. Regional governments are applying pressure on industries to develop new strategies to tackle this major issue. MEISCO, in partnership with some of the finest companies around the world, is able to offer technologies that minimize environmental damage.

We are committed to the cause of protecting the environment and in playing functional roles across the breadth of the pollution control and waste management industry. Our work entails developing industry-specific wastewater management programs that are not only workable but also economical for our clients. Our unique solutions include state-of-the art technologies and highly efficient processes to treat industrial waste water.

We offer products and services pertaining to Environmental Management Systems, Environmental Impact Assessments, Oil Spill Contingency Planning and Air Emissions Monitoring, as well as Noise & Vibration Studies and Protection Services, including Toxic Waste & Sewage Plant Treatments, Effluent Treatment, Consulting, Surveys and Research.

## AREAS OF EXPERTISE

### Consultancy and Feasibility Studies

We offer consultancy services and carry out feasibility studies and solutions which enable our clients to meet their business expansion objectives. Services include profit improvement studies (PIP), simulation studies and development.

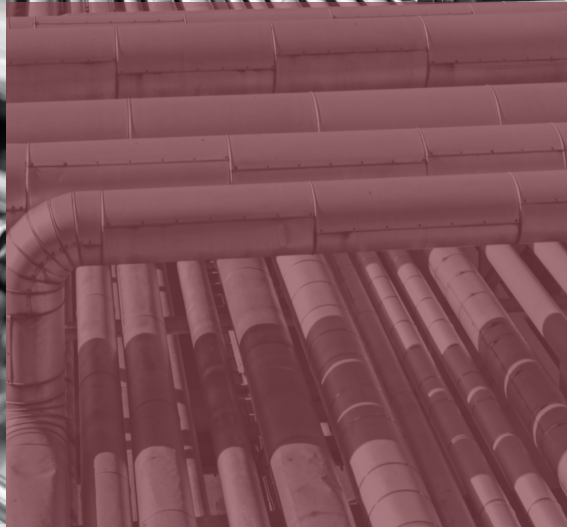

### Engineering, Procurement and Contracting (EPC)

Our specially selected Engineering, Procurement and Contracting (EPC) Partners use their building expertise in a variety of fields, including offshore oil/gas production facilities and platforms, successful launch, management, completion and implementation of all key stages in major projects—utilizing our knowledge, experience and core competencies.

OUR  
PRODUCTS

## PRODUCTS

The Following is a summary of some of our Partner's main products:

- Compressors, centrifugal, screw, reciprocating
- Steam Turbines
- Ball Valves
- Baglines, Packing Machinery
- Heat Exchangers
- Expansion Joints
- Pressure Vessels
- Transformers
- Switchgears, Switchboards
- Finned Tubes
- Line Pipes
- Level Instruments
- Liquid Ring Compressors
- Process Pumps
- Dust Control Systems
- Blowers, Fans
- Bio-remediation Technology
- Elbows, Tees
- Air & Gas Compression Packages
- Air & Gas Treatment Units
- Nitrogen Generated Packages
- Dosing and Chemical Injection Systems & Skids
- Welded Pipe & Welded & Seamless Weld Fittings
- Deaerators
